

Gambling With 2D Data Codes

Scanning a QR code today is like rolling the dice with your personal identifiable information (PII) or maybe even worse, your financial details.

6

Only six years since the first malicious QR code was discovered by internet security company, Kaspersky.

China's central bank regulating \$5 trillion QR and barcode mobile payment system due to risks and safety issues.

\$5 T

23%

Currently, over twenty-three percent of Trojans and viruses are transmitted via QR codes.

Is it worth the risk to your Brand?
